

6516205341.txt

Dear Ladies and Gentlemen, I would like to go on record to oppose the proposed legislation that would prohibit Satelite radio carriers from providing local weather and road conditions. As a long distance commuter, 128 miles each way on a daily basis, this is an invaluable service that I depend on for my daily commute. As a side note I believe that competition and not scare tactics and bullying should decide this issue. I choose to pay for Satelite radio service in my car, it offers me better selection and sound quality for my 4 hours or more of on the road time daily. It would be in every consumers best interest to let fair competition and not lobbyists decide this issue.

Regards  
Donald T. Jones
